

## Balboa Residential Parking Permit Program

Residents of the Balboa Peninsula have historically experienced parking shortfalls. Late night or overnight parking demand from commercial uses within Balboa Village (east of Adams Street) and commercial boating uses are seen as contributing factors that reduce parking availability in the residential area to the west of Balboa Village between 7th Street and Adams Street.

Residents from this area have proposed, and the Balboa Village Advisory Committee supports, the creation of an overnight Residential Parking Permit Program ("RP3") to eliminate "spillover" commercial parking onto the nearby residential streets. A preferential parking zone is proposed for all public streets between 7th Street and Adams Street, except for on-street metered stalls at the median in Balboa Boulevard (see map on reverse). Phase 1 (Island Avenue to Adams Street) would be implemented first with Phase 2 (7<sup>th</sup> Street to Island Avenue) implemented after the successful implementation of Phase 1 and if deemed necessary.

**ELIGIBILITY:** All residents within the proposed zone, including residents of Bay Island and Mooring Area C Permit Holders would be eligible to purchase permits.

**PARKING AVAILABILITY:** A parking permit holder would not be guaranteed an on-street parking space but would be allowed to park in the preferential parking zone during the posted hours wherever parking is available.

**HOURS:** On-street parking restricted to valid permit holders between 4:00PM – 9:00AM, 7 days per week, excluding federal holidays.

**NUMBER OF PERMITS:** Four (4) permits per household  
Six (6) overnight guest permits

**PERMIT TYPE:** Non-transferable parking permits would be issued annually and may be a sticker affixed to a resident's vehicle; a rearview mirror hangtag; or linked to a vehicle's license plate number. The method of permit is to be determined.

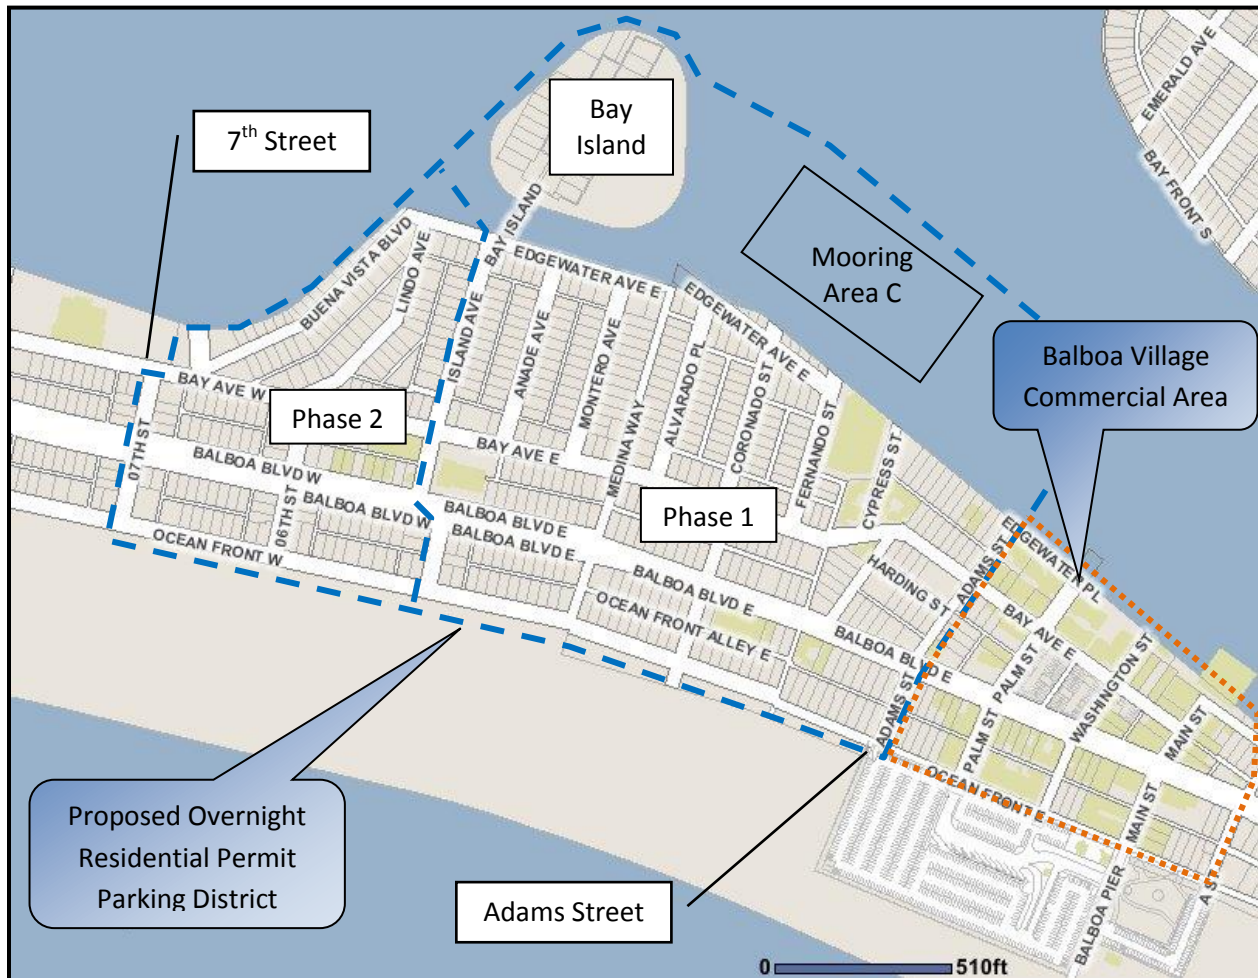

**PERMIT COST:** \$16 for each annual permit  
\$1 for each guest permit for each overnight period

**CHANGES:** The program outlined in this handout is subject to change and requires approval by the California Coastal Commission.

The City sent an advisory ballot all residents of the area (including renters), property owners, and Mooring Area C Permit Holders within the affected area to gauge support for the proposed permit program. A majority of residents in the affected area must support the program for it to be considered for adoption by the City Council. Ballots are due back to the City by **Friday, February 27, 2015**.
